

Product Information

Main Material: Composite resin / BMC

Standard Colors: Natural raw material colors

Type of Grate: Grates for Drainage System

Product Description

Composite resin (BMC) drainage grates represent a modern, lightweight, and resistant solution developed to ensure efficient water flow in urban, industrial, and commercial environments.

Manufactured with high-performance composite materials, they combine durability with practical and quick installation. Their resistance to heavy use and demanding conditions makes them a reliable technical choice, maintaining functionality without compromising the surrounding aesthetics.

Features

Main Material: Composite resin / BMC

Connection Type: Standard

Load Classa: B125, C250 (depending on model)

Net Weight: Depending on modelo

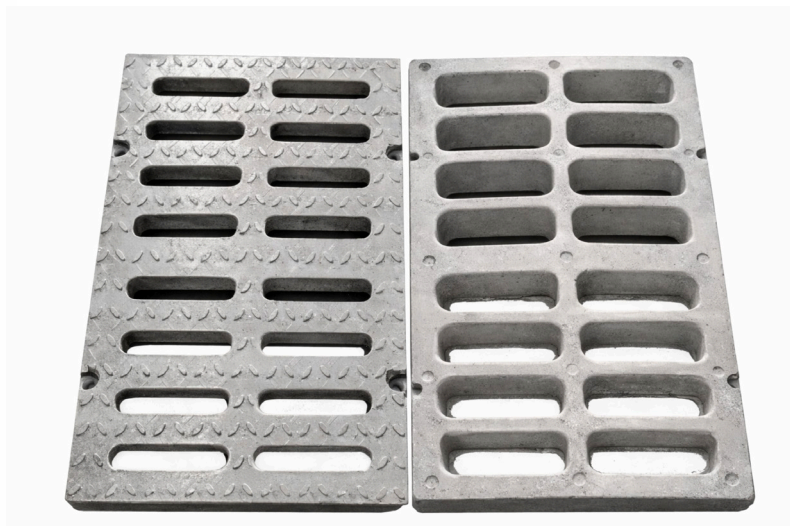

Dimensions

Width (mm)	Length (mm)
100 - 465	500 - 1000
-	-
